(X) Not applicable.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available.

\* Coal mined by the Anthracite Mining Services Industry is included in the production shown for the Anthracite Industry.

Includes figures for separately reported central offices and related facilities. These were not distributed by detailed types of operation.

Service establishments were requested to report man-hours by kind of work performed, rather than by department. The man-hours so reported have been allocated to the mine department where the service was performed. Thus "underground" man-hours represent such services as drilling, rock work, shaft sinking, and mine tunneling; "strip-pit, culm bank, and dredge" man-hours represents stripping overburden, strip-pit mining, and loading culm bank material; and "Surface" man-hours represent excavating, shoring work, hauling from mine to breaker, and other miscellaneous services.

Figures for nonproducing establishments are included with those for producing mechanical cleaning plants.

Less than one-half of the unit of measure specified.

Undistributed fuels costs for all Anthracite Mining Industries amounted to \$292 thousand; for the Anthracite Industry, \$197 thousand; and for the Anthracite Mining Services Industry, \$95 thousand.
